

## COOL SMOKE AN1040CS

Smoking material for Beekeeping use

**Specially designed for use exclusive with the Electric Heated Smoker ANELVPSM-01/3.7/6-ST and ANELVPSM-01/7.4/6-ST**

### Description

C.S. consists from materials that when heated produce vapor with the smell of burning wood without producing fire. The steam because of the smell of the burning wood transmits to the bees the same signal with the smoke produced with the traditional smiking materials when burning.

Becasaue of the vaporizing materials it is activated in very low temperatures (151C) and this has as the result the produced vapor to be just warm.

The fire distinguishing materials it includes minimizes by 10 times the time from the activation to the safe – non activation condition and this provides to the product a very special safety characteristic against fires in comparison with the tradition smiking materials.

### Directions of use

Follow the directions of the Electric Heated Smoker chapter B . Depending of the level of risk fire use the proper batteries . Always advise your national fire and civil protection departments about the safety of usage or any possible restrictions they have place. The table of usage stands for Greece and could be different in your country.

### Safety

#### Θέματα ασφάλειας-ΠΡΟΣΟΧΗ!

The vapor produced from the C.S. includes molecules that could harm your inspiratory system and/or irritate your eyes ( like the traditional smoke) . We advise the usage of a mask type A2B2 while you use the product (or any kind of smiking material for the bees) .

#### Απόρριψη-Disposal

The leftovers of the CS should be disposed in the waste cans

For professional use only

Keep awy of reach of children

Poisoning center

### Ingredients

Wood , Isopropylenglycol , glycerin , paraffin oil, salts of Natrium and Potassium , eesential oils
